8008—Not one, not two, not three—but five different varieties of Apples, all growing on one tree! Yes, Maloney's "5-N-1 Dwarf" is a complete heavy bearing orchard all by itself. If you have room for only one tree, choose the "5-N-1" for you can pick a succession of delicious Apples from early to late, time tested red, yellow and striped varieties. Even though these trees are "dwarf", the fruit is fancy size, appearing even bigger because of the illusion of large size fruit hanging from branches of a tree only head high. Since these trees will never grow higher than you can reach, you need no ladders, no pruning poles, no high pressure sprayers, just bushels of luscious fruit in two to three years. You need plant only one tree since the five varieties will cross pollinate each other. All these varieties on one tree—Early McIntosh, Yellow Delicious, Red Delicious, Cortland, Yellow Transparent. **PRICE:** 3-yr., large, 4-5 ft. trees, \$4.75 each; 2 for \$9.25.

Standard "Orchard Size" 5-in-1 Trees

Standard trees grow to a height of about one story and are recommended for all properties. Bears in about three to six years. Early McIntosh, Yellow Delicious, Double Red Delicious, Cortland, Yellow Transparent all on one tree. **PRICE:** 2-yr., large, 4-6 ft., \$3.50 each; 2 for \$6.75.
